

# July 2007

## HSC Communication Update

### HSC Management Group

(No meeting held in July)

Welcome new HSC Management Group Members!

Welcome to three new members!

Lisa Lichtie – Western – Dental Assistant Program  
Ray Abhold – UW-La Crosse – Associate Dean – College of Science and Health  
Peggy Denton – UW-La Crosse – Health Professions

Thanks to the following members whose terms were completed:

Doreen Olson – Western - 3 years  
Tom Kernozek – UW-La Crosse – 3 years  
Debbie Veglahn – UW-La Crosse – 1 year (Debbie accepted another position within UW-L and resigned from the committee.)

### Heating Plant Scheduled Shutdown

The University's central heating plant will be shut down beginning Sunday, August 5 (6:00 pm) through Saturday, August 11 (noon) for the yearly routine maintenance. During the shutdown, there will not be any steam services to the HSC building.

### Swipe Card Update

The new swipe card pads are being installed during the week of July 23. Please note the Anatomy Lab will be upgraded at a later date.

All faculty and staff who currently have a 'white swipe card' (for access to HSC building after hours) should have their organizational ID scanned at the information desk by Ann Peterson.

### Rooms 3061 and 3002 Potential Swap – "On Hold"

UW-L has put this 'swap' on hold for the fall semester, with a goal of completing between the fall and spring semester break.

### La Crosse Community Dental, Inc.

Dr. Dennis Loeffler (DDS) has signed a lease with the HSC. La Crosse Community Dental, Inc.'s main focus is to provide dental care to the underserved. Hours will vary during the semester depending on student classes in the dental hygiene lab.

### **Academic Team**

No meeting in July

### **Operation Team**

#### Operation Team Chair Confirmed

Terry Smith has willingly agreed to chair the Operation Team. Thanks Terry!

#### Student Printers in Computer Lab

As of July 1, UW-L students are no longer able to print in the computer lab.

Western will be replacing the Western printer prior to fall.

#### Restroom Faucet Update

There is a new 'sample' faucet in the women's restrooms located on the 2<sup>nd</sup> and 5th floor. They are easy to identify since they are taller than current ones. Depending on cost etc., restroom faucets may be changed, with the goal of having them all work consistently and spraying less water. Please feel free to provide input on any features you like or dislike on these faucets and send to Joanne Sandvick at [sandvick.joan@uwlax.edu](mailto:sandvick.joan@uwlax.edu).

### **IT/AV Team**

No meeting in July
