

# January 2015

## HSC Communication Update

### Misc.

#### Is it yours?

In room 2010 there was a "torso" skeleton left in the room. This has been moved to the Consortium's suite 3065 (Joanne Sandvick) for temporary storage. Please retrieve if this is missing from your department.

### Academic Team

#### Scheduling Policy Updated:

### IT/AV Team

#### Technology Upgrades

Room 2006: This room has been rewired to match all of the other non-distance education rooms on 2<sup>nd</sup> floor. All of the previous distance education components have been removed from 2006.

Rooms 2064, 2065, 2066 and 2067: The computer towers and screens have been upgraded in these rooms. In addition, "the behind the scenes wiring" is being converted to digital. From a user standpoint, the room will function the same.

Distance Education (DE) Rooms: Currently rooms 2002 and 3071 (conference room inside of Consortium suite 3065) has DE capability.

Last reminder: If you are still using VHS tapes, please have them converted to DVDs. As rooms are upgraded, or as VHS equipment fails, the VHS players will be removed. All rooms are able to play a DVD via the computer tower.
