

LMHSC Donation Expectations
Memorial Tree Donation

Memorial tree donations must be compatible with existing landscaping and grounds management plans, which will determine the location of tree(s). The size and species of the tree will be decided on with input from the donor. Trees will be obtained and installed by the Consortium through existing grounds management contracts.

If the tree should die, become diseased or damaged, the Consortium is not liable for replacing the tree but will review landscaping plans to determine whether replacement is feasible. The Consortium staff will make a reasonable attempt to contact the donor in the event a tree dies and will not be replaced.

The donation required for a memorial tree is \$XX, made payable to the La Crosse Medical Health Science Consortium. The Consortium will not begin any efforts to purchase or install a memorial tree until the entire gift is funded.

No plaques or permanent markers will be placed on trees or in the landscape beds. An appropriate area location inside the HSC may be discussed.

Date of Donation: _____

Amount of Donation: \$ _____

Donor contact information (address, phone):

Secondary contact (optional):

Donation will be used for:

Species of tree(s): _____

Location of tree(s): _____

Content of memorial plaque, if any:
